Directions:

Label the ready to use plate (PP002). Either streak, inoculate or surface spread the test inoculum (50-100 CFU) aseptically on the plate.

Principle:

Brain Heart Infusion Agar is highly nutritious and can support luxuriant growth of wide variety of microorganisms. It is a general-purpose medium used for primary isolation of aerobic bacteria from clinical specimens. Proteose peptone and infusions used in the media serves as sources of carbon, nitrogen, vitamins, amino acids, along with essential growth factors. Dextrose is the energy source. Sodium chloride maintains the osmotic equilibrium of the medium while disodium phosphate buffers the medium. Agar is solidifying agents.
