TECHN		SHEET	
ILCHI	NICAL	JULLI	

TE	CHNICAL SHE	EEI		
PP011 MacConkey Agar w	/ 0.15% B	ile Salts, CV	and NaCl	Plate
Formula				
Ingredients:	gms/li	t		
Peptone	1.50			
Tryptone	1.50			
Gelatin peptone	17.0			
Lactose	10.0			
Bile salts	1.50			
Sodium chloride	5.00			
Neutral red	0.03			
Crystal violet	0.001			
Agar	15.00			
Final pH (at 25°C): 7.1 <u>+</u> 0.2				
Directions:				
Label the ready to use plate (PP011)			e or surface	e spread the
test inoculum (50-100 CFU) aseptica	ally on the pl	ate.		
Principle:				
Lactose is a fermentable carbohyd equilibrium. Bile salts and crystal v gram-positive organisms. Neutral n	violet are sel	ective agents	s that inhit	oit growth of
strains grow as red or pink coloni precipitated bile. The red color is du of neutral red and a subsequent co falls below 6.8. Lactose non-ferment colorless, transparent and typically o	es and may ue to product olor change of ting strains, do not alter a 7.1 $\pm$ 0.2 Red with pu Sterile Mac	be surroun tion of acid f of the dye w such as Shig appearance o urplish tinge co Conkey Agar v	ded by a rom lactose hen the pH ella and Sa f the mediu ploured medi v/o 15% Bile	zone of acid e, absorption d of medium ilmonella are im um e salts, CV and

COLOUR OF COLOUR OF COLONY pink to red with bile precipitate pink to red with bile precipitate Pink to Red Colorless to pale pink

## BIOMARK Laboratories-INDIA www.biomarklabs.com TECHNICAL SHEET

Salmonella Paratyphi (A) 9150	50 -100	luxuriant	≥50 %	Colorless
Salmonella Paratyphi (B) 8759	50 -100	luxuriant	≥50 %	Colorless
Salmonella Typhi6539	50 -100	luxuriant	≥50 %	Colorless
Salmonella Abony NCTC 6017	50 -100	luxuriant	≥50 %	Colorless
Proteus vulgaris 13315	50 -100	luxuriant	≥50 %	Colorless
Shigella flexneri 12022	50 -100	Fair to good	30 -40 %	Colorless to pale pink
Staphylococcus epidermidis 12228	≥10 <sup>3</sup>	inhibited	≤0 %	-
Corynebacterium diphtheriae type gravis	≥10 <sup>3</sup>	inhibited	≤0 %	-

Precautions :	1. In Vitro diagnostic use only.
	2. Read the label before opening the container
Limitations :	1. Since the nutritional requirements of organisms vary, some strains may be encountered that fail to grow or grow poorly on this medium.
Use:	For selective isolation and differentiation of coliform organisms and other enteric pathogens.
Storage:	Store between 2-8°C. Use before expiry date on the label.
Packing:	10/20/50 disposable plates.
